PROFESSIONAL SUMMARY

Computer Science undergraduate (AI & ML) with hands-on experience building full-stack applications, RAG-based GenAI systems, and computer vision pipelines. Strong foundation in DSA, OOP, and DBMS, with a track record of designing and deploying end-to-end software systems independently and in teams.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript (ES6+)
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Full Stack: React.js, Next.js, FastAPI, Node.js, Express.js, MongoDB, SQL
AI / ML: YOLOv8, RAG / LLMs, OpenCV, NLP, Prompt Engineering, Computer Vision
Blockchain: Solidity, Hardhat, ethers.js, ERC-721, Polygon
Cloud & DevOps: Docker, IBM Cloud, CI/CD, Git & GitHub

EDUCATION

RNS Institute of Technology <i>B.E. in Computer Science (Artificial Intelligence & Machine Learning); CGPA: 8.96/10</i>	Bengaluru, Karnataka 2023 – 2027
MES Chaitanya Pre-University College <i>11th & 12th Standard, PUE Karnataka – PCMB: 97.25%</i>	Sirsi, Karnataka 2023
St. Michael Convent High School <i>10th Standard, KSEEB – 89.42%</i>	Dandeli, Uttara Kannada, Karnataka 2021

EXPERIENCE

AI Intern – TechSaksham (Microsoft & SAP CSR, via Edunet Foundation) <i>“AI: Transformative Learning” – AICTE Internship Program</i> Completed a 4-week AI internship; built a chatbot using NLP and Python, gaining hands-on experience with AI application development.	Nov 2024 – Dec 2024
---	---------------------

PROJECTS

VruCare – RAG-Based GenAI for Kidney Stone Info - Built a domain-restricted RAG system over 20+ medical PDFs using a hybrid BM25 + FAISS retriever with Reciprocal Rank Fusion; added history-aware query condensation (up to 5 turns) and safety guardrails to prevent hallucination. - Deployed a Streamlit UI with full documentation; live demo GitHub. Tech Stack: Python, LangChain, FAISS, BM25, VectorDB, Hugging Face, NLP, Streamlit	Sep – Dec 2025
PFTUS – Blockchain Fund Tracking System - Built milestone-based smart contracts with NFT approval verification for transparent government fund tracking on Polygon, with role-based dashboards for Government, Contractors, Auditors, and Citizens; GitHub. - Won 1st Runner-Up among 200+ teams at EPOCH '26 Hackathon. Tech Stack: Solidity, Hardhat, Next.js, React.js, Web3.js, Polygon	
Vision-Based Traffic Violation Detection System - Built a real-time system detecting red-light jumping, speeding, and helmet violations with multi-object tracking; processed 25+ FPS, detecting 9,500+ violations in testing; GitHub. Tech Stack: YOLOv8, OpenCV, FastAPI, React, Deep Learning, REST API	
ConsentLedger – Blockchain-Based Consent Management for Account Aggregator Framework Building an NLP + blockchain system to parse consent PDFs (Legal-BERT/T5), record consent on-chain via Ethereum smart contracts, and flag out-of-scope data access in real time. Tech Stack: Legal-BERT, T5, Solidity, Ethereum. <i>(Currently working on it)</i>	

CERTIFICATIONS

IBM Full Stack Software Developer Professional Certificate – 85.57/100	Mar 2026
IBM AI Developer Professional Certificate – 92.66/100	Feb 2026
Retrieval-Augmented Generation – DeepLearning.AI / Coursera	2026

ACHIEVEMENTS

1st Runner-Up – EPOCH '26 Grand National 24Hr Hackathon
Vemana Institute of Technology, Cybersecurity & Blockchain Track – among 200+ teams

LANGUAGES KNOWN

English, Hindi, Kannada, Marathi, Konkani
